

WASHING MACHINES

New larger load washing machines

As the leader in large load washing machines, Hoover has pioneered a range of machines with even larger capacities and additional practical features to make washing easier than ever.

The revolutionary VisionHD

The Hoover VisionHD is an innovative washing machine that offers a massive 8kg load and yet still fits within standard kitchen dimensions. It has an extra large porthole for easier loading and unloading and, thanks to the new PowerJet spray action, delivers an 'A' rated wash performance.

Nextra 7 & 6

Hoover has also introduced stylish new 7kg and 6kg versions of the successful Nextra washing machine range, each packed with practical features including variable temperature and variable spin, the superb Optima Wash System, and time countdown and delay start programmes.

6kg Top Loader

Recognising the need for large loads within small spaces, Hoover has introduced a new and unique 6kg top loader in a 40cm width. It offers a 1400 spin speed and triple 'A' performance.

8KG WASHING MACHINES

VISIONHD VHD8161

- Massive **8kg** Load

WASHER DRYERS

Nextra 7 & 6 Washer Dryers

The Nextra range of advanced, easy to use washer dryers combines all the features of a Hoover washing machine with the convenience of a dryer and offers a choice of practical, large capacity laundry solutions.

The Nextra 7 can wash a massive 7.5kg load and dry an impressive 5kg, while the Nextra 6 can wash a 6kg load and dry 4kg.

Both offer spin options of up to 1600rpm plus all the advanced features of our Nextra washing machines, including the **Optima Wash System**, to give you the best wash ever with the minimum of effort.

Auto Sensor Drying

All Hoover washer dryers incorporate Automatic Sensor Drying which protects your clothes and saves electricity by taking the guesswork out of setting the drying time. You simply select the degree of dryness you require and the dryer switches off automatically when it is reached. Hoover Nextra washer dryers give you the added flexibility of 3 levels of sensor drying to choose from, meeting all your drying needs. Additionally, for airing or quick drying, dryers can be set to a timed period.

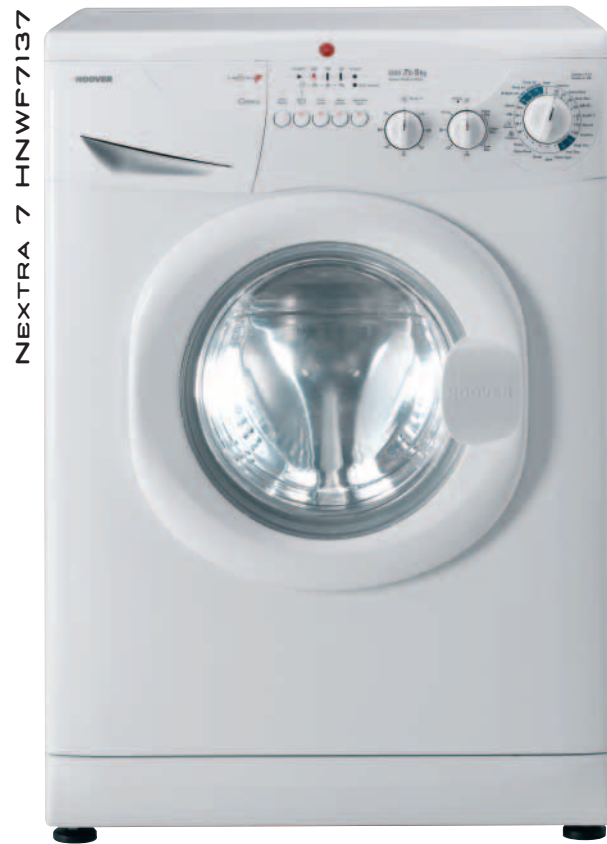

7.5KG + 5KG WASHER DRYERS

TUMBLE DRYERS

Nextra Tumble Dryers

The Hoover Nextra tumble dryer range gives you the choice of vented models, where steam is vented through a hose, and condenser models, where steam is condensed into water and stored in a large container for emptying. We also offer a new, innovative condenser Hydro Dryer where there is no need to empty the container as moisture is pumped directly down your drainage pipe.

Massive 8kg and 7kg loads

The combination of an extra large drum and the latest technology means that all Nextra 8 dryers are able to take loads of up to 8kg - 60% more than standard 5kg machines - saving you a great deal of time, effort and energy consumption. We also have a Nextra 7 range which take large 7kg loads.

Automatic drying system

The Nextra Sensor Dry Electronic models feature a Sensor Dry system that prevents damage to your clothes through over drying and saves on energy too. You simply select the dryness level you require, from damp to fully dry, then the system calculates the drying time and automatically switches off when complete. You have a choice of up to six pre-selected dryness levels to meet your exact drying needs.

Help with the ironing

All Nextra dryers feature a short heated conditioning **Fast Iron** cycle that helps relax fabrics that may have become piled up or stiff, making them easier to handle for quicker ironing. For smaller loads, there are also up to five **Fast Dry** cycles, while the top of the range Nextra Megaload can take extra care of woollens with a delicate **Wool Finish** programme.

Making more time for you

Certain models offer an advanced **Countdown Display** that tells you the time remaining in the cycle, while the Hydro Dryer also has an **LED Time Manager Display** that shows you minute by minute when the load will be ready, plus a **Start Delay** control enabling you to take advantage of off-peak electricity.

Easier emptying

For easier, more convenient emptying, selected Nextra 8 models have a condenser drawer at the top of the machine rather than at the base.

Unique Hydro Dry

The new Hoover Hydro Dryer features a unique Hydro Dry Technology Carefree system that means there is no need to empty the water container at all, as it is pumped out through your mains water supply. This unique system also makes the Hoover Hydro Dryer the quietest condenser on the market at only 62db – That's only a quarter of the noise standard condenser dryers make!*

*Standard condenser dryers at 67db.

8KG & 7KG TUMBLE DRYERS

NEXTRA HNV172

- Large **7kg** Load Capacity
- Up to 165 Mins Drying Time
- 'Cool Airing' Cycle

DISHWASHERS

Nextra Dishwashers

Hoover dishwashers have been designed with intelligent solutions to meet the toughest dishwashing requirements.

You can choose between the full size Nextra 12-place capacity model and two Nextra Mega Load 15-place capacity models, both triple 'A' rated. Alternatively, if you only have limited space, the new 45cm wide Nextra Slimline offers an 8-place capacity and is available in both white and silver.

All models have an attractive, sleek styling and are packed with practical features including:

- Unique maxi-flex basket design*. The lower basket of the 15 place setting Nextra dishwashers is unique because not only does it take up to 25% more load, it can also accommodate a wider variety of dishwasher proof items
- One touch programme selection. An indicator light illuminates the most popular wash cycle on all full size Nextra dishwashers. All you have to do to select the programme is simply press the button once
- Unique Power Centre spray action for our best wash ever
- Click-clack upper basket for easy height adjustment whether the basket is full or not (on selected models only)
- Rapid 29 minute wash for those lightly soiled items
- Intensive 75° 'Bactizero' cycle eliminating 99.9% of bacteria that may be present

*15-place setting models only
